Mosquito Dunks

These are cool becasue they are organic and wont hurt fish or other wildlife. Mosquito Dunks are ready-to-use larvicide tablets for standing water. Place one dunk in ponds, birdbaths, rain barrels, or other mosquito breeding areas. Each dunk releases a bacterial larvicide that prevents mosquito larvae from developing into adults. Reapply as needed, especially after heavy rainfall or when the dunk is depleted. Do not use in water intended for human consumption. Mosquito Dunks target Aedes, Culex, and other container-breeding mosquito larvae.
